--	---

1.0 BACKGROUND

In accordance with the Ontario Environmental Assessment Act (the Act), the environmental assessment (EA) process is an open, transparent decision-making process that considers the potential environmental effects (both positive and negative) of a proposal before proceeding. Consultation and engagement are key components to this process.

The following document provides the proposed framework for engagement, specifically as it relates to the EA for the Township of North Dundas Waste Management Plan (the Project). This framework was developed in accordance with the Code of Practice: Consultation in Ontario's Environmental Assessment Process (MECP 2014). This plan is intended to be a progressive and adaptable document that evolves throughout the EA process.

2.0 KEY TERMINOLOGY

Term	Definition
Engagement (sometimes referred to as consultation)	A two-way communication process that is intended to: <i>"identify concerns; identify relevant information, identify relevant guidelines, policies and standards; facilitate the development of a list of all required approvals, licenses or permits; provide guidance to the proponent about the preparation of the terms of reference (ToR) and EA; ensure that relevant information is shared about the proposed undertaking; encourage the submission of requests for further information and analysis early in the EA process; enable the ministry to make a fair and balanced decision"</i> (MECP 2014)
Government Review Team (GRT)	Public sector staff from government ministries and agencies who contribute to the EA process. This includes: federal, provincial (including Conservation Authorities) and municipal levels (MECP 2014). The initial list of GRT members is initially provided by the Ministry of Environment, Conservation and Parks (MECP) and is further refined throughout the EA process
Indigenous communities (also referred to as Aboriginal or First Nation groups, depending on the specific context)	The <i>Constitution Act, 1982</i> specifies that Aboriginal peoples include Indian, Inuit and Métis peoples of Canada. Each of these groups are considered separate peoples with unique heritages, languages, cultural practices and spiritual beliefs (AANDC 2012)

Term	Definition
The Ministry (or Minister)	The MECP
The Proponent	The Township of North Dundas (the Township)
Stakeholders	Any individual or organization with an interest in a particular undertaking, including but not limited to: surrounding land owners, environmental groups, local organizations and associations and Indigenous peoples. Interested persons (sometimes referred to as stakeholders) are not required to demonstrate that they will be directly impacted by a proposal (MECP 2014)

3.0 PRINCIPLES OF ENGAGEMENT

The engagement methods outlined below are intended to collect and disseminate information, stimulate discussion, and invoke participation in the EA process while developing and maintaining positive, constructive relationships. The process is intended to encourage stakeholder and GRT participation and input, and appropriately consider that input in decision- making during the EA process.

The following principles were developed to guide this engagement plan:

- Inlusiveness – Implement a range of opportunities for engagement (e.g., semi-structured open houses, as well as feedback options over the phone or via email);
- Clarity – Be clear about the intended outcomes of an engagement opportunity;
- Accessibility – Ensure all public materials and public venues are in compliance with the Accessibility for Ontarians with Disabilities Act;
- Balance – Give serious consideration to all input received as part of any decision-making process;
- Transparency – Share information in an open, transparent and accessible manner;
- Timeliness – Initiate engagement efforts well in advance of decisions and provide stakeholders with reasonable timeframes for input; and,
- Completeness – Inform stakeholders of the final decision and results.

4.0 KEY STAKEHOLDERS

There are proposed to be three groups of key stakeholders for the Project:

- GRT members;
- Indigenous communities; and
- Other interested persons.

The roles and responsibilities for each of these groups is further discussed in Section 6.0 below.

4.1 Government Review Team Members

The MECP provided the proponent with a standardized and current list of GRT members a different times throughout the Project. These distribution lists were reviewed and refined in the context of the proposed Project. Where there is no potential overlap between the Project and the mandate of a specific GRT member, they will be excluded from engagement activities. All other GRT members will remain on the distribution list for the Project until such a time as they request to be removed. GRT lists were updated on occasion based on updates from the MECP, or guidance from the GRT department.

4.2 Indigenous Communities

The MECP were consulted early in the Project planning process to confirm which Indigenous communities should be notified about the Project.

4.3 Other Interested Persons

At this time, there are no known local community associations, organizations or clubs with a potential interest in the Project. Information will be shared with local residents across the Township. Should any specific persons or groups identify an interest, they have been added to the Project distribution list.

5.0 OBJECTIVES OF CONSULTATION

This Consultation Plan has been prepared with the following consultation objectives in mind:

- To generate and maintain awareness and understanding of the proposed Project.
- Gain insight in how stakeholders wish to be consulted.
- For the Proponent to understand available information and environmental concerns of the GRT, Indigenous communities and local community and address and incorporate that information into decision making where possible.
- To promote mutually acceptable, environmentally sound solutions.

5.1 Key Decision Making Milestones

During the ToR there was one key decision-making milestones related to this Project and decision-making around this milestone was completed during the two Open Houses as follows:

- Identification of components of the environment to consider, available 'Alternatives To' related to this Project and how to evaluate the 'Alternatives To'.

To meet the objectives of consultation, Open Houses with the public and other stakeholders and technical bulletins were scheduled during the following key decision-making milestones in the EA process. In situations where Open Houses were proposed in the approved ToR but could not be held due to public safety associated with the COVID-19 pandemic, technical bulletins were distributed in their place. The main milestones are:

- 1) Results of the Waste Diversion Study through distribution of Technical Bulletin #1.
- 2) Identification of the preferred 'Alternatives To' was to be via Open House but instead was through distribution of Technical Bulletin #2.
- 3) Identification of the preferred 'Alternative Method' through distribution of Technical Bulletin #3.
- 4) Reviewing the draft EA including results of the impact assessment through in-person and virtual Open House #3.

The frequency and timing of consultation allowed for public and other stakeholders with an interest in the waste management plan the opportunity to contribute to decision making and to influence decision before moving forward to the next step in the planning process.

5.2 Issues Resolution Strategy

Throughout the EA process, the Township solicited feedback and information from the local community, government agencies, Indigenous communities, and other interested persons about the proposed waste management plan. Issues identified were reviewed by the Township and a reasonable effort was made to respond to concerns raised throughout the planning process. The Township has attempted to resolve all issues or disputes to reach a resolution that is amenable, recognizing that interests of multiple stakeholders and/or regulations may sometimes dictate a resolution that may not be desirable to all parties. There were no issues where mutually agreeable resolution was not achieved and the matter had to be referred to the MECP for guidance.

6.0 METHODS FOR ENGAGEMENT

A multi-modal approach to engagement was proposed for this Project. Interactions with key stakeholders will be ongoing throughout the EA process; however, there will also be semi-structured events designed to optimize engagement of potentially interested parties. The engagement activities proposed consist of the following:

- Letter and email distribution of public notices (including but not limited to the Notice of Commencement (NOC) for the ToR and the NOC for the EA);

- Publication of notices in the local newspaper(s) and on social media;
- Development and maintenance of a Project website;
- Formal or informal meetings with Indigenous communities (as required);
- Council presentations (if required, one for each of the ToR and EA phases);
- Public open houses (proposed to be two events during the ToR phase and two events during the EA phase of the EA process noting that as a result of the Covid-19 Pandemic only one open house occurred during the EA);
- Two technical bulletins during the EA noting that as a result of the Covid-19 Pandemic three technical bulletins were prepared during the EA;
- Informal meetings, telephone calls and discussions with local politicians, business owners, community organizations, and any other interested persons throughout the EA process.

The proposed schedule for each of the proposed public open houses are depicted on Figure 1.

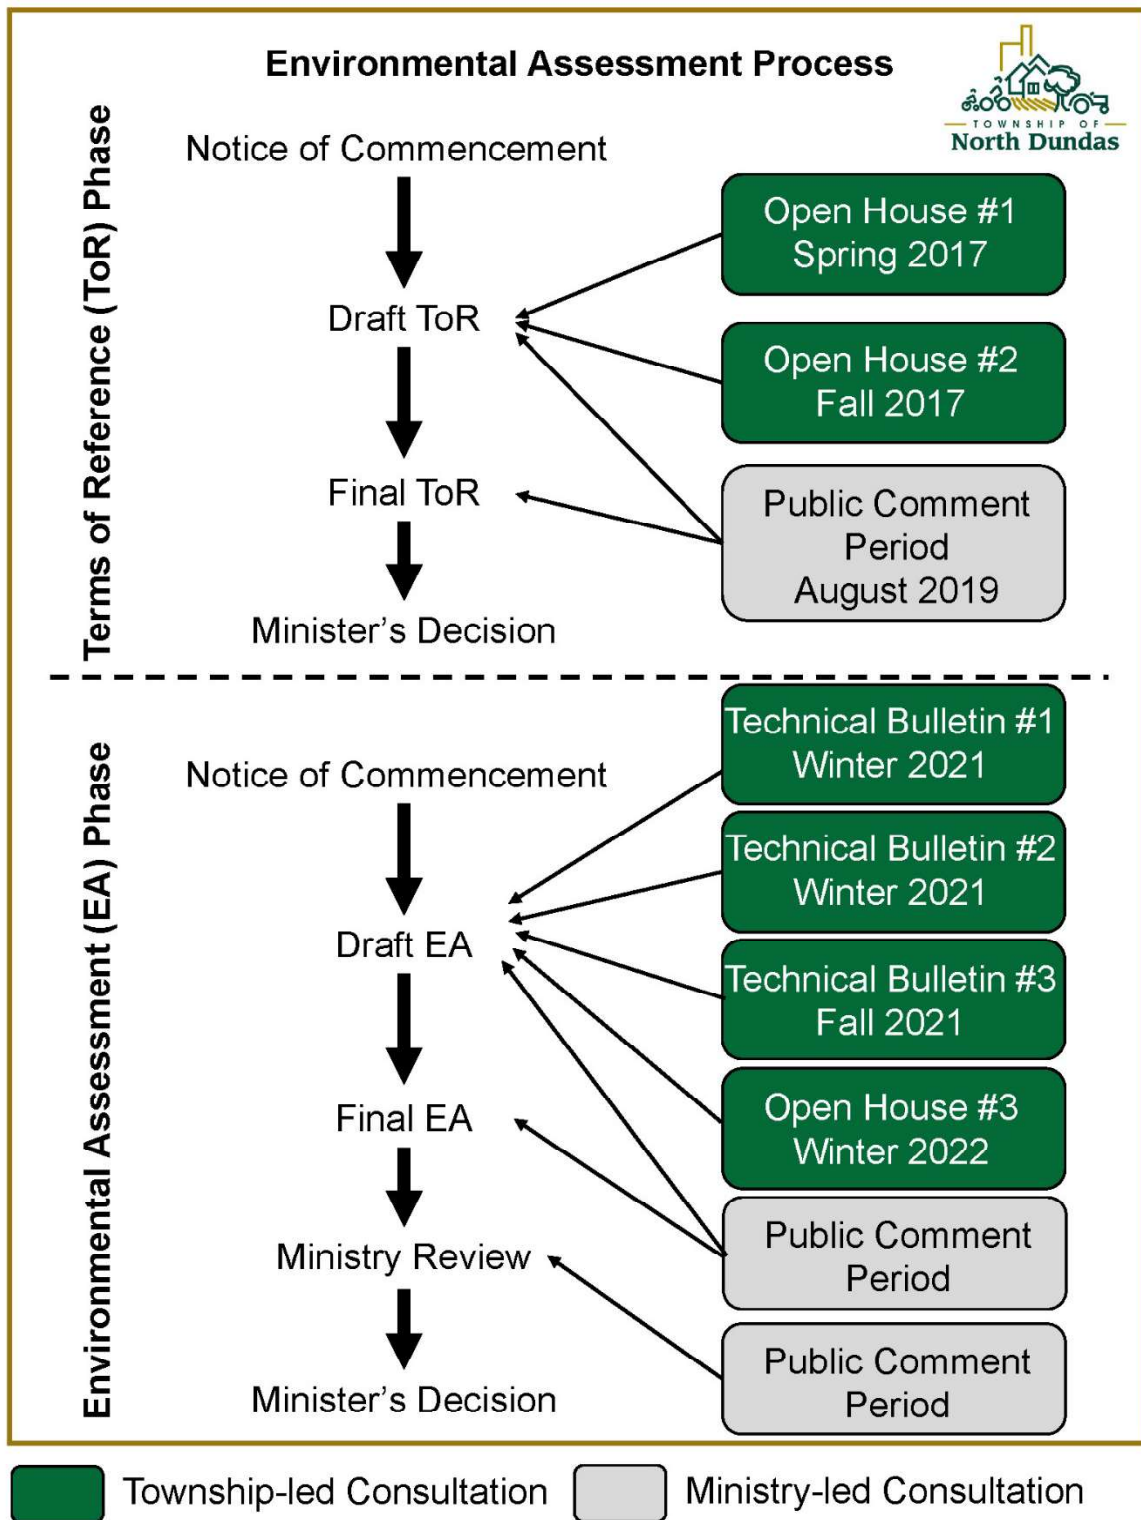

Figure 1: Proposed Schedule of Engagement Activities

7.0 ROLES AND RESPONSIBILITIES

- Ministry – The administrative branch of the MOECC ensures that proponents meet the requirements of the Act, while technical reviewers within the MOECC ensure that proponents have adequately considered the Ministry’s mandate and requirements (MOECC 2014). The core responsibilities of the Ministry (as a whole) are as follows:
 - 1) Review of information compiled by the proponent (including the contents of the Consultation Record that accompany each of the ToR and EA)
 - 2) Provide consistent information and guidance within their mandate area;
 - 3) Provide timely and constructive input that facilitates good decision-making;
 - 4) Encourage and facilitate the resolution of outstanding concerns;
 - 5) Coordinate reviews by the GRT;
 - 6) Lead consultation with stakeholders on the documents submitted to the Ministry for formal approval; and,
 - 7) Maintain the public record file.
- Proponent – In accordance with Section 5.1 of the Act, a proponent is responsible to “consult with such persons as may be interested” in a Project. At a minimum, the proponent must consult with stakeholders once during the ToR phase and twice during the EA phase (MECP 2014). The core responsibilities of the proponent are as follows:
 - 1) Design and implement a consultation plan;
 - 2) Identify and undertake meaningful consultation with stakeholders;
 - 3) Keep participants informed; and,
 - 4) Document how input from stakeholders was incorporated into the decision making process.
- **Stakeholders (GRT)** – Are invaluable resources throughout the EA process. Their responsibilities are different from other stakeholders as they are public servants with defined mandates (MECP 2014). The core responsibilities of the GRT are as follows:
 - 1) Provide consistent information and guidance within their mandate area;
 - 2) Provide timely and constructive input that supports good decision making; and,
 - 3) Participate in the Ministry review and provide comments within the specified or regulated timelines.

- **Stakeholders (Indigenous Communities)** – Are an important source of information and a key stakeholder in the decision-making process for a Project. The core responsibilities of Indigenous communities are as follows:
 - 1) Identify an appropriate point of contact and communicate any community-specific engagement plans;
 - 2) Identify any Aboriginal claims and communicate any Aboriginal or treaty rights that could be impacted by the Project;
 - 3) Openly share information that might be relevant to the Project; and,
 - 4) Provide timely and constructive input that supports good decision-making.
- **Stakeholders (Interested Persons)** – Are an important source of local information and a key stakeholder in the decision-making process for a Project. The core responsibilities of interested persons are as follows:
 - 1) Indicate an interest in the Project and participate in consultation opportunities;
 - 2) Openly share information that might be relevant to the Project; and,
 - 3) Provide timely and constructive input that supports good decision-making.

8.0 RECORD OF CONSULTATION

All notices, publicly posted materials, consultation events and correspondence with the GRT, Indigenous communities and stakeholders will be maintained as part of the public record for the Project. Relevant information will be compiled and presented in the Consultation Record submitted to the Ministry as part of each of the ToR and EA.

8.1 Personal Information

In accordance with the Freedom of Information and Protection of Privacy Act and the Environmental Assessment Act, unless otherwise stated in a submission, any personal information such as: name, address, telephone number and property location included in a submission relevant to the Project will become part of the public record files and will be released, if requested, to any person.

9.0 INDIGENOUS COMMUNITY CONSULTATION

It is recognized that Indigenous communities have specific interests and rights with regard to consultation on projects that might potentially affect them. The consultation with Indigenous communities provides insight into the potential effects on Indigenous communities, including the potential effects on use of lands for traditional purposes. It is also recognized that Indigenous communities may have specific and differing needs with regard to how they would like to be consulted.

9.1 Identification of Indigenous Communities

The MECP was consulted early in the Project planning process to confirm which Indigenous communities should be notified about the Project. It is noted that an Indigenous community can still have an interest and be included in consultation, even if they are not identified by the Proponent or the MECP.

The MECP identified Huron Wendat, Algonquins of Ontario and Mohawks of Akwesasne as being Indigenous Communities with a potential interest in this EA.

9.2 Methods for Consultation

A multi-modal approach to engagement is proposed for this Project. Interactions with Indigenous communities will be ongoing throughout the EA process; however, there will also be semi-structured events designed to optimize engagement of potentially interested parties. The engagement activities proposed consist of the following:

- Letter and email distribution of notices (including but not limited to the Notice of Commencement (NoC) for the ToR and the NoC for the EA, as well as notices of formal consultation events, review of draft reports and Notices of Submission of final proposed ToR and EA.)
- For all letters and emails distributed a follow up phone call or calls or email will be provided to Indigenous communities to ensure material was received, understand any consultation requirements or preferences and receive any feedback, comments or questions.
- When notices are provided about formal consultation events the Indigenous communities will also be asked if they would like to be consulted in another manner or would like a separate meeting to present findings and share information.
- Development and maintenance of a Project website as a repository for notices, reports, consultation event documents, feedback forms etc.
- Providing draft and final reports in hard or electronic copy as requested by the Indigenous community.
- Formal or informal meetings with Indigenous communities (as required or requested).
- Public consultation events - two event during the ToR phase and two events proposed during the EA phase (although only one occurred) of the EA process.
- Technical bulletins as another mechanism to distribute information during key decision making milestones - proposed to be two during the EA phase (although three occurred).

For specific details about the more formal events planned for the ToR and EA, see Section 6.0.

Key Guidelines in Determining the Government Review Team for Projects and in Conducting Circulations

The “Government Review Team Master Distribution List” is meant as a tool and an information source to ensure that matters pertaining to environmental assessment (EA) submissions are routed to the proper contacts within Federal, Provincial and Municipal agencies. The list also contains agency contacts for information purposes and links to agency websites where additional information may be obtained.

For individual EA projects, prior to submission of a draft Terms of Reference for a project, the Project Officer will provide a copy of the Government Review Team (GRT) list to the proponent (or its consultant). The proponent should review the list and indicate which agencies and sections/staff within these agencies it believes should be circulated the Terms of Reference and subsequent EA, and provide a brief written explanation for those which are not believed to be relevant for the project (i.e. X ministry only wishes to review projects within X distance from a certain type of facility and the project will be further than that away from the such facilities). The proponent should contact the agencies proposed to be included to confirm their inclusion. The proponent should provide the proposed list to the Project Officer for review and input. Obtaining Project Officer input of the GRT for the particular project will help avoid having to notify additional agencies late in the process.

During the EA process, proponents’ request for comments from agencies which accompanies the EA documentation should outline that, if the agency has no concerns on the EA or has no interest in the project, a written letter, completed “no comment form” (if provided by proponent) or email stating this to the proponent would be preferable. This lets the Project Officer know that an agency is satisfied at a certain stage in the process and/or that no further circulation to the agency is necessary. Proponents should also follow-up with the agencies by telephone and email to ensure the proper person received the documentation and to reiterate the preference that a statement of no concerns or no interest is provided, if applicable.

This list is periodically updated. Anyone using this list should request the most up-to-date version by contacting:

Environmental Assessments Branch

Environmental Assessment Services – Duty Officer at:

416-314-8001; or 1-800-461-6290; or enviropemissions@ontario.ca

Important Notes on the Contents of this List

1. The default method by which agencies receive EA documents is by courier of a hard paper copy. Some agencies have indicated they are willing to accept (or prefer) electronic versions by email, CD, USB or downloading from websites (with notice of document availability at a website and a request for comments sent by mail or by email), but unless they indicate they are willing to accept this, hard copies are sent.
2. For all agencies, if a project is going to be located or have effects within more than one of their review districts/regions, then all relevant districts/regions should receive the full documentation and the cover letter should notify them which other districts/regions of their ministry are also receiving the documentation. The same should be done if more than one office within a ministry will be circulated a document and the offices are not divided based on geographic areas. This should be confirmed with individual agencies to determine distribution requirements.
3. This list was originally primarily used for individual EAs but is also now being used to indicate, in general, which agencies wish to review projects prepared under Class EAs or other streamlined EA process. For detailed information on which agencies are to be considered for circulation on projects under particular Class EAs or streamlined EAs, please consult the particular Class EA or streamlined EA guide and/or the proponent of the Class EA.

Name, Position, Agency and Address	Document Form	Phone, Fax and Email	Types of EA Projects to be Circulated
PROVINCIAL AGENCIES & MINISTRIES			
Conservation Ontario

Indigenous Services Canada and Crown-Indigenous Relations and Northern Affairs Canada			
Aboriginal and Treaty Rights Information System (ATRIS)		http://sidait-attris.aadnc-aandc.gc.ca/attris_online/	ATRIS is a web-based mapping interface that provides information on the location and nature of established and potential Aboriginal and treaty rights. This website can be used to assist proponents in identifying potentially affected Indigenous communities for specific projects.
Indigenous Services Canada (ISC)		https://www.canada.ca/en/indigenous-services-canada.html	Works with partners to improve access to high quality services for First Nations, Inuit and Métis peoples of Canada and improve socio-economic conditions in Indigenous communities.
Crown-Indigenous Relations and Northern Affairs Canada (CIRNAC)		https://www.canada.ca/en/crown-indigenous-relations-northern-affairs.html	Responsible for managing relations between the Government of Canada and First Nations, Inuit and Métis peoples of Canada, based on a government-to-government relationship model.
Transport Canada			
Transport Canada does not require receipt of all individual or Class EA related notifications. Proponents are	Electronic copy	EnviroOnt@tc.gc.ca	Contact to see if they have an interest in the EA.

Name, Position, Agency and Address	Document Form	Phone, Fax and Email	Types of EA Projects to be Circulated
<p>requested to self-assess if their project will interact with a federal property and require approval and/or authorization under any Acts administered by Transport Canada (see list to the right of the most common Acts that Transport Canada administers that have been applied to EA projects).</p> <p>If the proponent has determined that Transport Canada will not provide an approval/or authorization related to their project, Transport Canada is to be removed from the project distribution list.</p>			<p>Transport Canada does not require receipt of all individual or Class EA related notifications. We are requesting project proponents self-assess if their project:</p> <ol style="list-style-type: none"> 1. Will interact with a federal property and/or waterway by reviewing the Directory of Federal Real Property, available at www.tbs-sct.gc.ca/dfrp-rbif/; and 2. Will require approval and/or authorization under any Acts administered by Transport Canada* available at http://www.tc.gc.ca/eng/acts-regulations/menu.htm. <p>Projects that will occur on federal property prior to exercising a power, performing a function or duty in relation to that project, will be subject to a determination of the likelihood of significant adverse environmental effects, per Section 82 of the <i>Impact Assessment Act, 2019</i>.</p> <p>If the aforementioned does not apply, the Environmental Assessment program should not be included in any further correspondence and future notifications will not receive a response. If there is a role under the program, correspondence should be forwarded <i>electronically</i> to: EnviroOnt@tc.gc.ca with a brief description of Transport Canada's expected role.</p> <p>Summary of most common Acts administered by TC that have applied to projects in an EA context:</p> <ul style="list-style-type: none"> • Canadian Navigable Waters Act (CNWA) – the Act applies primarily to works constructed or placed in, on, over, under, through, or across navigable waters set out under the Act. The Navigation Protection Program administers the CNWA through the review and authorization of works affecting navigable waters. Information about the Program, CNWA and approval process is available at: http://www.tc.gc.ca/eng/programs-621.html. Enquiries can be directed to

Name, Position, Agency and Address	Document Form	Phone, Fax and Email	Types of EA Projects to be Circulated
			<p>NPPONT-PPNONT@tc.gc.ca or by calling 519-383-1863.</p> <ul style="list-style-type: none"> • Railway Safety Act (RSA) – provides the regulatory framework for railway safety, security, and some of the environmental impacts of railway operations in Canada. The Rail Safety Program develops and enforces regulations, rules, standards and procedures governing safe railway operations. Additional information about the Program is available at: https://www.tc.gc.ca/eng/railsafety/menu.htm. Enquiries can be directed to RailSafety@tc.gc.ca or by calling 613-998-2985. • Transportation of Dangerous Goods Act (TDGA) – the transportation of dangerous goods by air, marine, rail and road is regulated under the TDGA. Transport Canada, based on risks, develops safety standards and regulations, provides oversight and gives expert advice on dangerous goods to promote public safety. Additional information about the transportation of dangerous goods is available at: https://www.tc.gc.ca/eng/tdg/safety-menu.htm. Enquiries can be directed to TDG-TMDOntario@tc.gc.ca or by calling 416-973-1868. • Aeronautics Act – Transport Canada has sole jurisdiction over aeronautics, which includes aerodromes and all related buildings or services used for aviation purposes. Aviation safety in Canada is regulated under this Act and the Canadian Aviation Regulations (CARs). Elevated Structures, such as wind turbines and communication towers, would be examples of projects that must be assessed for lighting and marking requirements in accordance with the CARs. Transport Canada also has an interest in projects that have the potential to cause interference between wildlife and aviation activities. One example would be waste facilities, which may attract birds into commercial and recreational flight paths. The Land Use In The Vicinity of Aerodromes

Subject: Notice of Commencement - Environmental Assessment of the Township of North Dundas Waste Management Plan
Date: September 10, 2020 5:17:00 PM
Attachments: [1648253_DOC065_Township of North Dundas Waste Management Plan NOC EA Phase_10Sept2020.pdf](#)

Hello,

As a listed Indigenous Community stakeholder in the Individual Environmental Assessment (EA) for the Township of North Dundas Waste Management Plan, we are herein informing you that the amended Terms of Reference submitted to the Ministry of the Environment, Conservation and Parks (MECP) was approved by the Minister on July 1, 2020 and the framework from the amended Approved Terms of Reference will guide the work and studies that will then be completed during the Environmental Assessment.

The second step in the process is to develop an Environmental Assessment study which should be carried out in accordance with the amended Approved Terms of Reference and the requirements of the *Environmental Assessment Act*. You will find attached the Notice of Commencement (NOC) of the EA study.

Please do not hesitate to contact me if you have any questions.

Regards,

Yannick

Yannick Marcerou (M.Eng., P.Eng.)

EXTERNAL EMAIL

Good morning Yannick,

Thanks for your email and information on the Environmental Assessment of the Township of North Dundas Waste Management Plan.

Could you please let us know if any archaeological assessment is planned under the EA process ?

Thanks and best regards,

Maxime Picard

Objet: Notice of Commencement - Environmental Assessment of the Township of North Dundas Waste Management Plan

Hello,

As a listed Indigenous Community stakeholder in the Individual Environmental Assessment (EA) for the Township of North Dundas Waste Management Plan, we are herein informing you that the amended Terms of Reference submitted to the Ministry of the Environment, Conservation and Parks (MECP) was approved by the Minister on July 1, 2020 and the framework from the amended Approved Terms of Reference will guide the work and studies that will then be completed during the Environmental Assessment.

The second step in the process is to develop an Environmental Assessment study which should be carried out in accordance with the amended Approved Terms of Reference and the requirements of the *Environmental Assessment Act*. You will find attached the Notice of Commencement (NOC) of the EA study.

Please do not hesitate to contact me if you have any questions.

Regards,

Yannick

Hello,

The Township of North Dundas (Township) is undergoing an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*. The EA Study will evaluate long-term solid waste management options for a 25-year planning period and enhanced at-source waste diversion is being considered as an 'Alternative To'.

As part of the approved amended Terms of Reference (ToR) requirements, the Township committed to conduct a Waste Diversion Study. As per the consultation plan presented in the approved ToR, a Technical Bulletin summarizing the results of the Waste Diversion Study has been published on the [project website](#) for review by Indigenous Communities stakeholders and a feedback form is also available to provide comments to the EA Study team. Both files are attached to this email and contain instructions to contact the EA Study team and return a filled out copy of the feedback form.

Please do not hesitate to contact me if you have any questions.

Regards,

Yannick

Hello,

As discussed earlier over the phone, you will find attached the consultation documents recently sent to you on behalf of the Township of North Dundas as part of their Environmental Assessment (EA) of the Township's Waste Management Plan.

All project files are also posted on the project website at this address:

<https://northdundas.com/landfillea>

As I mentioned, we will be issuing shortly Technical Bulletin #2 presenting the 'Alternative To' for this EA. It replaces the Open House originally planned for this consultation due to the current situation of the pandemic. As requested, we will be mailing you electronic copies (PDFs) of the consultation documents in a USB drive.

Please do not hesitate to contact us (see contact information on the consultation documents attached) if you have any questions or comments to provide.

Have a good evening!

Sincerely,

Yannick

NOTE: This email chain appears to contain email from outside Golder

Hello,

Sorry for the delay. Although no archaeological study has been completed yet, we can confirm that the project will

include a desktop archaeological assessment during the EA study to determine if any intrusive archaeological assessment needs to be completed. We expect the desktop assessment to be completed in the coming months.

We can keep you updated when the desktop assessment within the EA project area is complete and send you our results to discuss any next steps.

We will be sending you shortly another Technical Bulletin and Feedback Form to present the 'Alternatives To' for this EA. It replaces the previously planned Open House on this subject due to the Stay at Home order in place in the province.

Please confirm that we can continue to email you documents circulated for stakeholders' consultation for this EA. Hardcopies or electronic copies (PDFs) of these documents can also be made available to you on request.

Thank you in advance!

Sincerely,

Yannick

Hello,

We wanted to confirm that you had received our Technical Bulletin (and Feedback Form, see attached) presenting the results of the Waste Diversion Study we completed for the Township of North Dundas as part of their Environmental Assessment (EA) of the Township's Waste Management Plan.

We also sent you a Notice of Commencement for the EA in September (see attached).

Please confirm that we can continue sending consultation documents for this EA to this email address (jstavinga@tanakiwin.com). We can also at your request send you hardcopies of these documents or a USB drive with the electronic copies (PDFs). All project files are also posted on the project website at this address: <https://northdundas.com/landfillea>

We will be issuing shortly Technical Bulletin #2 presenting the 'Alternative To' for this EA. It replaces the Open House originally planned for this consultation due to the current situation of the pandemic.

Please do not hesitate to contact us (see contact information on the consultation documents attached) if you have any questions or comments to provide.

Have a good evening!

Hello,

The Township of North Dundas (Township) is undergoing an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*. The EA Study will evaluate long-term solid waste management options for a 25-year planning period.

As part of the EA Study, the Township will: evaluate 'Alternatives To' the Waste Management Plan (WMP), identify the preferred WMP, characterize the existing environmental conditions, identify and develop 'Alternative Methods' of waste management, compare the 'Alternative Methods', identify mitigation measures and determine net environmental effects.

The Township has prepared a new Technical Bulletin (#2) presenting the different 'Alternatives To', the environmental components and corresponding evaluation criteria considered, as well as the preliminary results of this evaluation (see attached).

This Technical Bulletin #2 has been published on the project website for review by Indigenous Communities stakeholders and a feedback form is also available to provide comments to the EA Study team. Both files can be accessed at <https://northdundas.com/landfillea/>. A hardcopy or an electronic copy of these documents on a USB drive can be made available upon request.

Please do not hesitate to contact us if you have any questions.

Regards,

Yannick

RE: Township of North Dundas EA – Consultation

Hello,

My name is Yannick Marcerou, environmental engineer working for Golder Associates Ltd. I am calling you regarding the Township of North Dundas Environmental Assessment for the Waste Management Plan that we are currently preparing.

We wanted to confirm that you have received our emails from Sept 2020 and Jan 2021 regarding this EA and we wanted to confirm that we can continue to send you consultation documents via the email address Grand.chief@akwesasne.ca

If you need it, we can provide as well hardcopy of these documents or electronic copies in PDF by mailing you a USB drive with the files.

We will be sending you shortly a Technical Bulletin # 2 presenting the 'Alternatives To'. It replaces the OH#3 that was planned due to the COVID-19 situation.

Chief Abram Benedict: Please send me the files in a USB drive.

YJM: will do! When we issue TB#2, we'll mail you the USB drive with the corresponding files.

Confirmed mailing address on file.

The EA phase is just starting and we will be completing an archeological assessment of the site and report back to you the results for comments.

Hello,

The Township of North Dundas (Township) is undergoing an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*. The EA Study will evaluate long-term solid waste management options for a 25-year planning period.

The Township identified the preferred 'Alternative To' in the previous technical bulletin (February 2021) as Boyne Road Landfill Site Expansion. As part of the EA Study, the Township will: evaluate 'Alternative Methods' of landfill site expansion, compare the 'Alternative Methods' and identify the preferred 'Alternative Method', identify mitigation measures, and determine net environmental effects.

The Township has prepared a new Technical Bulletin (#3) presenting the different 'Alternative Methods' of landfill expansion, the environmental components and corresponding evaluation criteria considered, as well as the preliminary results of this evaluation (see attached).

This Technical Bulletin #3 has been published on the project website for review by Indigenous Communities and a feedback form is also available to provide comments to the EA Study team. Both files can be accessed at <https://www.northdundas.com/municipal-services/environmental-assessments>. A hardcopy or an electronic copy of these documents on a USB drive can be made available upon request.

Please do not hesitate to contact us if you have any questions.

Subject: North Dundas Environmental Assessment Consultation

Hello,

We are reaching out to you to confirm a point of contact for our ongoing Environmental Assessment for the Township of North Dundas Waste Management Plan.

We were previously in contact with Janet Stravinga but stop receiving contact in early 2020 when your office closed for the pandemic. We now know that Janet is longer working with the Algonquins of Ontario as of September 2021. We have sent requests and information off to the general consultation email, algonquins@tanakiwin.com but have received no response.

We would like to ensure that the Algonquins of Ontario receive the opportunity to provide comment on this Environmental Assessment. We acknowledge that you are listed as a Finance Manager but are hoping you can connect us with a new person to contact for consultation on this project. We recently completed a Stage 1 Archaeological Assessment to share from the Site assessment.

Thank you for your time.

Regards,
Rob McDonald

Hello,

My name is Robert McDonald from Golder Associates. I am currently assisting the Township of North Dundas with their ENvironmental Assessment for the Waste Management Planning for the Boyne Road Landfill.

We wanted to confirm that you have received our recent email regarding this EA and the recently completed third technical bulletin on the Alternative Methods of Landfill Expansion.

If you have any questions regarding the content of the technical bulletin or the current status of the EA, you can contact me at robert_mcdonald@golder.com or by phone at 613-592-9600. If you have an alternate email or phone number you would like me to contact, please let me know.

If you need it, we can provide a hardcopy of these documents or electronic copies in PDF by mailing you a USB drive with the files. Thank you.

EXTERNAL EMAIL

Kwe Yannick,

I am writing to you as a follow-up to the emails below, I am taking over your requests on behalf of the Ontario consultation team.

I will be the main resource for consultation requests in Ontario for the Huron-Wendat Nation, Lori-Jeanne may give me a hand from time to time and Mario is my supervisor.

We would indeed like to receive the AA for review and comment, is there funding available to help us review it all? My colleague Marie-Sophie (cc'd) will be able to provide a quote and coordinate our participation to this project.

Please contact us if archeological fieldwork is required in the future for this project.

Objet : Township of North Dundas Waste EA - Archaeological Component

Hello Mr. Picard,

As discussed over the phone, the Township of North Dundas (Township) is completing an environmental assessment (EA) for the Township's Waste Management Plan under the Environmental Assessment Act. The EA Study has evaluated long-term solid waste management options for a 25-year planning period. As part of the EA Study, the Township completed a Stage 1 archaeological assessment background study, as defined in the Ontario Ministry of Heritage, Sport, Tourism, and Culture Industries' (MHSTCI) Standards and Guidelines for Consultant Archaeologists (2011), including a site visit of the study area which mostly includes parts of the current Boyne Rd Landfill property.

This Stage 1 archaeological assessment resulted in the following recommendations:

- 1) No further archaeological assessments are required for the study area.
- 2) Should archaeological resources be identified during the landfill expansion in the areas identified as having low archaeological potential on Map 9, a licensed archaeologist should be contacted and additional archaeological assessment may be required.
- 3) Should landscape disturbance extend beyond the present Stage 1 study area, additional archaeological assessment may be required.

This report was recently submitted to the MHSTCI (PIF number P1107-0045-2021) as a condition of licensing in accordance with Part VI of the Ontario Heritage Act, R.S.O. 1990, c. 0.18. Please do not hesitate to contact us if you would like to review the report and/or comment on the findings of this assessment as part of the EA consultation.

As it is our understanding that you no longer coordinate EA consultations, would you mind sending us the contact information of your replacement at the Huron-Wendat Nation? You can forward this information to your colleague and copy us in.

Thank you in advance for your help!

Sincerely,

Yannick Marcerou (M.Eng., P.Eng.)
Environmental/Waste Engineer

Hello Dominic,

Sorry for the delay in responding to your email from November 26, 2021. Our team has attached the Stage 1 Archaeology Assessment for your review. In the report, the study area identified was determined to have low potential for archaeological resources no further Archaeological Assessments will be required for this study area. We welcome you to review the Stage 1 Archaeology Assessment and provide feedback but we unfortunately will not be able to provide any budget for your review. We do not anticipate any future archaeological field work will occur for this project, nor will a Stage 2 Archaeology Assessment be prepared.

I would also like to confirm that you received our Technical Bulletin #3 that was distributed last week.

Please do not hesitate to reach out if you have any questions on the assessment, the technical bulletin, or the project in general.

Regards,
Rob McDonald

Hello,

The Township of North Dundas (Township) is undergoing an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*. The EA Study will evaluate long-term solid waste management options for a 25-year planning period.

As part of the EA Study, the Township will: evaluate 'Alternatives To' the Waste Management Plan (WMP), identify the preferred WMP, characterize the existing environmental conditions, identify and develop 'Alternative Methods' of waste management, compare the 'Alternative Methods', identify mitigation measures and determine net environmental effects.

The Township has prepared work plans in consultation with the Ministry of Environment, Conservation and Parks, Ministry of Natural Resources and Forestry and conservation authorities for how the individual environmental components (technical teams studying aspects of the environment like air, noise, groundwater, etc.) will complete aspects of their individual component studies following completion of the identification of the preferred WMP. These work plans were prepared in advance of Technical Bulletin #3 that you were notified of on November 29, 2021 and were meant to be circulated in advance of Technical Bulletin #3 but are being provided to you now for your comment. Please see the attached work plans or visit the EA Study website

<https://www.northdundas.com/municipal-services/environmental-assessments> to review the details of the studies.

Please do not hesitate to contact us if you have any suggestions, additions or questions related to the work plans.

Regards,

Hello,

The Township of North Dundas (Township) is undergoing an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*. The EA Study will evaluate long-term solid waste management options for a 25-year planning period.

The Township wants community feedback on the proposed EA and is hosting a third open house (both in-person and virtually) on **April 7, 2022** at Council Chambers in the Township Office (636 St. Lawrence Street, Winchester). There will be a presentation starting **at 6:30pm**, followed by a question period until 8:00pm.

For participants who would like to participate in the open house virtually, here is the link to register for the Zoom Webinar: https://us06web.zoom.us/webinar/register/WN_yKnD2Lq7Qa2N1uk2blGHug

At this open house, the public will learn about the results and conclusions from the EA, including the confirmed identification of the preferred 'Alternative Method' of landfill expansion, the results of the existing conditions studies, the predicted effects on the environment, and the commitments the Township is making to mitigate any potential adverse effects.

We welcome your participation at the Open House. Please do not hesitate to contact us if you have any questions.

Regards,

Yannick Marcerou, *he/him*

Hi,

We wanted to follow up with you to remind you of tomorrow's Open House on the proposed Waste EA to be held in-person and virtually at Council Chambers in the Township of North Dundas at 6:30pm.

You will find below the link to register for the Zoom Webinar.

https://us06web.zoom.us/webinar/register/WN_yKnD2Lq7Qa2N1uk2blGHug

The Open House material and feedback form will be posted on the project website tomorrow for your review (<https://www.northdundas.com/municipal-services/environmental-assessments>).

Please do not hesitate to contact us if you have any questions or comments on this EA.

Sincerely,

Yannick Marcerou, *he/him*
Environmental/Waste Engineer, M.Eng., P.Eng.

Hello,

The Township of North Dundas (Township) is undergoing an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*. The EA Study will evaluate long-term solid waste management options for a 25-year planning period.

The Township wants community feedback on the proposed EA and is hosting a third open house (both in-person and virtually) on **April 7, 2022** at Council Chambers in the Township Office (636 St. Lawrence Street, Winchester). There will be a presentation starting **at 6:30pm**, followed by a question period until 8:00pm.

For participants who would like to participate in the open house virtually, here is the link to register for the Zoom Webinar: https://us06web.zoom.us/webinar/register/WN_yKnD2Lq7Qa2N1uk2blGHug

At this open house, the public will learn about the results and conclusions from the EA, including the confirmed identification of the preferred 'Alternative Method' of landfill expansion, the results of the existing conditions studies, the predicted effects on the environment, and the commitments the Township is making to mitigate any potential adverse effects.

We welcome your participation at the Open House. Please do not hesitate to contact us if you have any questions.

Meeting Summary

Environmental Assessment of the Township of North Dundas Waste Management Plan

Meeting with Huron-Wendat Nation Regarding the proposed Environmental Assessment

April 21, 2022, 3:00pm

Attendees

Golder Associates Ltd. (Golder) – Trish Edmond, Yannick Marcerou
Huron-Wendat Nation (HWN) – Dominic Ste-Marie

Item		Summary
1.	Introductions	
2.	Project Background <ul style="list-style-type: none"> North Dundas and its landfill <ul style="list-style-type: none"> Map, landfill location Existing Site Conditions/footprint Current Diversion Initiatives EA Process <ul style="list-style-type: none"> Started in 2016 ToR approved (July 2020) EA Studies completed Open House #3 on the Proposed EA (April 2022) Draft Proposed EA to be circulated in the coming weeks. 	<ul style="list-style-type: none"> Golder provided some geographical context: <ul style="list-style-type: none"> The Township is located approx. 50km south of downtown Ottawa. The small operating landfill considered for expansion is located 2km east of the Village of Winchester, ON. HWN indicated not being aware of any of its members living in the area. Golder showed the current disturbed waste footprint of the existing landfill as well as the footprint of the proposed expansion. Golder summarized the EA process for this undertaking (including past consultations) and indicated that the draft proposed EA Study Report would be circulated in the coming weeks. Mr. Ste-Marie confirmed that he was familiar with EAs in general. Golder listed the 'Alternatives To' considered in the EA. Golder indicated that all prior consultation material were provided to the previous contact at HWN, Mr. Picard, including the first two Technical Bulletins. The third Technical Bulletin as well as the Stage 1 Archeological Assessment Report were provided to Mr. Ste-Marie. HWN confirmed that their archeologist reviewed the Archeological Assessment Report and didn't have any comment on it.

Item	Summary
<p>3. Review of preferred alternative</p> <ul style="list-style-type: none"> • Landfill expansion combined with increased waste diversion • Existing diversion activities 	<ul style="list-style-type: none"> • Golder indicated that the preferred 'Alternative To' determined during the EA Study is to expand the existing landfill, combined with an increase in waste diversion rate over time. • The landfill is authorized to accept only non-hazardous waste (municipal waste as well as industrial, commercial & institutional waste). • Incoming loads are inspected by site personnel. • Waste is compacted and they apply daily cover material. • The site also has an approved Material Recycling Facility (for paper and cardboard, as well as metal cans and recyclable plastics [Blue Box Waste]). • They divert leaf and yard waste as well but don't compost Source-Separated Organics (kitchen waste). • A Hazardous Waste Depot is also authorized at the Site (transfer site).
<p>4. HWN Comments on Landfilling Operations</p> <ul style="list-style-type: none"> • Beyond current diversion • Long term vision of waste management and value 	<ul style="list-style-type: none"> • HWN indicated that they tend to have long term view and make planning decisions by thinking 7 generations ahead. • HWN asked if there could be consideration for strategic placement and document of certain waste within the landfill in case what is considered waste today could be determined to be beneficial in the future. By segregating and knowing where this waste is located, it would make it easier to access in the future. • HWN emphasized that planning is easier than addressing the issue after the facts. • As an example, HWN proposed to have site personnel document the type of waste landfilled and its location within the footprint. • Golder acknowledged these comments and will inquire internally if other colleagues had seen landfill operations integrating this kind of approach (other than asbestos waste). It will also be discussed with the Township to determine if it would be feasible based on their experience at the site. • Golder mentioned some landfills undergo mining projects which allow them to retrieve valuable resources from legacy landfill cells (metals, wood, or excess cover material). These projects also allow to reclaim disposal volume. This is not

Item		Summary
		proposed at the Boyne Road Landfill as these materials have not been identified in excess.
5.	Review of Key Impacts Considered in the EA <ul style="list-style-type: none"> Groundwater and surface water Impacts Biological impacts 	<ul style="list-style-type: none"> Golder presented a site plan of the preferred (in terms of impacts) expansion design, including controls to be in place such as the perimeter ditch, the proposed location of the stormwater pond, the proposed contaminant attenuation zone, and the portion of Volk Drain which would have to be isolated from groundwater (via a culvert or a liner). Volk drain being classified as fish habitat, input (and possibly a permit) from the Department of Fisheries and Oceans is necessary to place a culvert or line a portion of the municipal drain. Golder explained how leachate is generated and how impacts to groundwater and surface water quality must be controlled to comply with regulatory requirements. A description of subsurface condition was also provided. Golder indicated that no bottom liner is proposed in this design based on modeling showing that natural attenuation with sufficient contaminant attenuation zone would allow meeting regulatory requirements. An environmental monitoring program will be in place to assess compliance with water quality guidelines and make sure landfilling operations do not have a substantial negative impact on the local flora and fauna. HWN asked if the leachate parameters' concentrations would be too high for vegetation to accomplish the necessary treatment. Golder replied that concentrations would exceed the water quality guidelines from Ontario Ministry of Environment, Conservation and Parks and as such they would not allow for vegetative treatment. Golder summarized the findings of the terrestrial biology survey: two bird and two bat species at risk would be disturbed by the project and the bats would require compensation measures (e.g. bat boxes, studies, etc.). Then the findings of the aquatic biology survey were summarized: <ul style="list-style-type: none"> the existing perimeter ditch will have to be moved and it is proposed to raise it above ground surface to avoid

Item		Summary
		<p>impacted groundwater discharging into it.</p> <ul style="list-style-type: none"> ○ Quart Drain is always dry and would drain away from the site anyway ○ Fish habitat in Volk Drain is therefore the main focus of aquatic impacts.
6.	<p>HWN Comments on Key Impacts</p> <p>Vegetation in ditches and pond</p> <p>Supervision of excavation for potential archeological artefacts</p>	<ul style="list-style-type: none"> • HWN Noted their biology team just completed a study on bats and if studies are part of the mitigation for this site, they may have relevant information and/or could assist. • HWN asked if ditches and the proposed stormwater pond will be vegetated, preferably with local native plants to provide an appropriate ecosystem for potential fish population. • Golder indicated that landfill final covers receive native species but will have to confirm for ditches and ponds. • HWN asked if excavations (ditches, pond) will be appropriately monitored for archeological artefacts. Although HWN does not appear to be directly affected by this project, it could still have been a hunting ground (with potentially arrow heads). HWN specified that it would be appreciated if someone other than heavy equipment operators could supervise excavations. • Golder will provide the exact language typically used in EAs for measures to control archeological impacts as it is common to find EA conditions / commitments to report findings. Golder indicated that the town's Director of Waste Management usually supervises activities at the site and he may supervise excavations. It was noted that the perimeter ditch and the expansion base will not require excavations.

Item	Summary
<p>7. Other feedback from HWN</p>	<ul style="list-style-type: none"> • <u>HWN</u> confirmed that electronic copies of the draft EA report can be sent to them. • <u>HWN</u> indicated not having other outstanding concerns at the moment. They will review and comment the draft report. • <u>Golder</u> highlighted that the public did not express a lot of interest for this project, likely because it is the municipality's own landfill for their own waste generated locally. • <u>Golder</u> also highlighted that there would be two opportunities to provide feedback on the proposed EA: once with the circulation of the draft EA Report and a second one with the circulation of the final EA Report. Electronic copies (in PDF format with bookmarks to easily navigate through the documents) of these reports will be downloadable via a secured hypertext link but they can also be provided on a USB drive sent by mail if requested.
<p>8. Review of Action Items</p>	<ul style="list-style-type: none"> • <u>Golder</u> will evaluate the idea of documenting the location and type of waste landfilled to facilitate material recovery if deemed necessary or valuable in the future. • <u>Golder</u> will confirm if drains and the proposed stormwater pond are to be vegetated and, if so, would native species be used. • <u>Golder</u> will provide <u>HWN</u> with typical EA Conditions or commitments regarding archeological impacts during excavations. It will evaluate with the Township the level of supervision expected to address this potential impact.

Hello,

The Township of North Dundas (Township) has completed a draft Environmental Assessment (EA) of the Township of North Dundas Waste Management Plan. The Township is seeking input on the draft EA. Please see the notification letter in the link provided outlining further information on the EA, the draft EA and how to submit comments on the draft EA. An electronic copy of the draft EA is also provided on the project website at <https://www.northdundas.com/municipal-services/environmental-assessments> and consists of all volumes (Volumes 1 to 4).

As a requirement of commitment 15 in the approved Terms of References, the draft EA Study Report will be available for public review and comment from May 27, 2022 to June 24, 2022 for a four-week review period.

Following the above review period, the draft EA Study Report will be updated to address comments received and will be submitted to the Ontario Ministry of the Environment, Conservation and Parks (MECP) as part of the formal review process.

Should you require a hard copy (or an electronic copy in a USB drive) of the draft EA Study Report, please email or call us and we will be happy to prepare it for you. If you wish to save a copy of the files provided in this email for future reference, please download and save them to your local computer drive as the download link will expire on June 25, 2022.

Please let us know if you have any issues accessing the notice letter or the draft EA Report from the link provided.

Sincerely,

Yannick Marcerou

Objet : RE: [1648253] North Dundas Waste EA - April 21, 2022 DRAFT Meeting Summary

Hi Dominic,

We have finalized our meeting summary and you will find it attached.

Regarding Item 4 of our conversation, the following response to your feedback will be provided in the EA:

Although waste diversion was historically not part of a municipality's waste management system, it has been part of the Township's waste management system for many years; it is proposed to further enhance the diversion program during the operating period of the landfill expansion. The Township's focus is on pro-active waste diversion, with the objective of having to dispose of less waste material that has value in the landfill. In this regard, the Township diverts electronic waste, tires, metal, refrigerants, and household hazardous waste (as well as typical household recyclables such as paper, glass, metal and plastics) from landfill. The Township also directs construction & demolition wastes generated in the Township to locations other than the Boyne Road landfill for recycling or disposal and accepts only a limited amount of commercial or industrial waste materials at the landfill. Also, the municipality provides an electronic Recycle Coach, to provide residents and businesses with information so they can divert as much as possible from landfill. Lastly, as part of landfill site operations, incoming loads are checked by the site attendant to direct materials to the appropriate locations, again with the objective of increased diversion.

It is acknowledged that, in future, specific materials that are not currently thought to have value could be identified as having a beneficial re-use. However, considering that the landfilling will mostly be the residual from a diverted residential waste stream because of the Townships' proactive diversion approach, it is anticipated there would be little material disposed that would be of benefit in the future, and that would warrant the significant effort to locate, excavate and separate it from other wastes for re-use (let alone the regulatory approvals required to do so and the disturbance to the landfill to create such excavations). Furthermore, this a small municipality and the potential quantity of any such material would be small. Although recording the disposal position within the landfill is done for a limited number of specific types of wastes, it is not a done for disposed waste in general. For all of these reasons, the Township does not propose to segregate and record the position of the post-diversion waste placed in the landfill.

Regarding the surface water aspects of Item 6 of our conversation, we can confirm that the proposed stormwater pond and the replacement perimeter ditch will be vegetated with a seed mix similar to the landfill final cover. Consideration will be given to inclusion of native species in the planting above the pond's normal operating level.

Regarding the archeological aspects of Item 6 of our conversation, there is a commitment in the EA that says: "Should archaeological resources be unexpectedly encountered during the landfill expansion, a licensed archaeologist will be contacted to assess the need for additional archaeological assessment." When excavation work associated with the proposed expansion is required, the Landfill Site Manager or their designate will periodically observe the excavation area to specifically look for the presence of archaeological resources.

Please do not hesitate to contact us to share your feedback or if you have any questions. Let us know if you plan on commenting on the draft EA circulated a couple weeks ago or if you would like to schedule a meeting to discuss it.

Have a good afternoon.

Regards,

Yannick Marcerou, *he/him*

Objet : [1648253] North Dundas Waste EA - April 21, 2022 DRAFT Meeting Summary

Hi Dominic,

You will find attached for your review the draft summary we prepared of our April 21, 2022 meeting to discuss the proposed North Dundas Waste EA.

Please let us know if you have any comments or edits to provide to the summary by May 17, 2022.

We are still in the process of addressing the comments you made during the meeting and we can likely provide you some responses next week.

Sincerely,

Yannick Marcerou, *he/him*

RE: Township of North Dundas EA – Circulation of draft EA

Voicemail:

Hello,

My name is Yannick Marcerou from Golder Associates Ltd. calling you on behalf of the Township of North Dundas regarding the draft Waste Environmental Assessment we circulated for comments a couple of weeks ago.

We wanted to confirm that you were able to download all the files and have received the USB drive with the files in question we mailed you. Please let us know if you had any issue opening them.

Also, we wanted to know if you intended to comment on this draft EA or if you would be interested in setting up a meeting to discuss it.

You can reach me at 613-592-9600 ext. 3318.

Talk to you soon!

Notice of Commencement

Environmental Assessment of the Township of North Dundas Waste Management Plan

The Township of North Dundas (Township) is beginning an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*.

What is Being Proposed?

The proposed EA Study is the EA of the Township's waste management plan for management of waste for a 25-year planning period. The Township is seeking to accommodate management of waste corresponding to the consumption of approximately 400,000 m³ of waste landfill disposal (amount to be confirmed during the EA Study) from 2022 to 2047, as its existing Boyne Road Landfill is currently at capacity. The EA Study will evaluate long-term solid waste management options to achieve this objective. Waste diversion can influence the amount of waste requiring disposal over the planning period; waste diversion is proposed as an alternative to be considered, including completion of a diversion study concurrently with the EA. The EA Study will include the area identified as the Township as shown using the black dotted line on the map below.

The Process

On July 1, 2020, the Minister of the Environment, Conservation and Parks (MECP) approved the amended terms of reference (ToR) for the proposed EA of the Township's Waste Management Plan. A copy of the approved amended terms of reference is available at: <http://northdundas.com/town-hall/landfill-recycling/environmental-assessments/landfill/ea/>

The approved amended ToR is also available at the following locations during normal business hours:

Township Office
636 St. Lawrence Street
Winchester, ON
(613) 774-2105

Winchester Public Library
547 St. Lawrence St N., 2nd Floor
Winchester, ON
(613) 774-2612

Counties of Stormont, Dundas
and Glengarry Office
26 Pitt Street
Cornwall, ON
(613) 932-1515

This study will be carried out in accordance with the approved amended ToR and the requirements of the EA Act. Results from this study will be documented in an EA, which will be submitted to the MECP for review. At that time, the public, Indigenous communities, and other interested persons will be informed when and where the EA can be reviewed.

Consultation

Members of the public, agencies, Indigenous communities, and other interested persons are encouraged to actively participate in the planning process by attending consultation opportunities or contacting staff directly with information, comments, or questions. Consultation opportunities are planned throughout the planning process and will be advertised in the local Chesterville Record and through the Township's website at <http://northdundas.com/town-hall/landfill-recycling/environmental-assessments/landfilllea/>.

If you would like to be added to our project mailing list or have project-related questions, please contact:

Doug Froats
Director of Waste Management
Township of North Dundas
636 St. Lawrence Street, P.O. Box 489
Winchester, ON K0C 2K0
Telephone: 613-774-2105 ext. 228
Fax: 613-774-5699
E-mail: dfroats@northdundas.com

Trish Edmond, P.Eng.
EA Project Manager
Golder Associates Ltd.
1931 Robertson Road
Ottawa, ON K2H 5B7
Telephone: 613-592-9600 ext. 3246
Fax: 613-592-9601
E-mail: trish_edmond@golder.com

If you require any accommodations for a disability to review the approved ToR, contact Doug Froats at 613-774-2105 ext. 228 to make the appropriate arrangements.

All personal information included in a submission – such as name, address, telephone number and property location – is collected, maintained and disclosed by the Ministry of the Environment, Conservation and Parks for the purpose of transparency and consultation. The information is collected under the authority of the *Environmental Assessment Act* or is collected and maintained for the purpose of creating a record that is available to the general public as described in s.37 of the *Freedom of Information and Protection of Privacy Act*. Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential. For more information, please contact the Project Officer at 437-244-9402 or the Ministry of the Environment Conservation and Park's Freedom of Information and Privacy Coordinator at 416-314-4075.

Hello,

As a listed Government Review Team stakeholder in the Individual Environmental Assessment (EA) for the Township of North Dundas Waste Management Plan, we are herein informing you that the amended Terms of Reference submitted to the Ministry of the Environment, Conservation and Parks (MECP) was approved by the Minister on July 1, 2020 and the framework from the amended Approved Terms of Reference will guide the work and studies that will then be completed during the Environmental Assessment.

The second step in the process is to develop an Environmental Assessment study which should be carried out in accordance with the amended Approved Terms of Reference and the requirements of the *Environmental Assessment Act*. You will find attached the Notice of Commencement (NOC) of the EA study.

Please do not hesitate to contact me if you have any questions.

Regards,
Yannick

Chesterville loses pole to windy conditions

The strong winds that swept through North Dundas gave some extra work for Winchester's hydro crews. There were five hydro crews working late into Sunday fixing power problems throughout the area. In this photo a crew was in Chesterville near the intersection of Main Street and Joseph Street. A hydro pole had been pushed over by the wind and almost caused a great deal of damage. The pole had snapped at its bottom as a result of the wind and the weight of the cables on it. Hydro worked through out the night to strip the pole of existing wires and cables, dug a hole for a new pole and put it up transferring all of the power to the new pole.

Awards of Excellence returns for second year

MORRISBURG – The Municipality of South Dundas is pleased to announce the second annual Awards of Excellence Program. Nominations for the awards will open on September 9, 2020 with a deadline for entry of October 1, 2020. Due to the COVID-19 Pandemic, this year's Awards will be presented to the winners virtually.

The Municipality of South Dundas Awards of Excellence recognize and celebrate growth and success in the Municipality. These Awards shine a spotlight on success stories of local businesses and

individuals who are contributing to the growth of the South Dundas community.

The eight award categories include: Agricultural Leadership Award, Business of the Year Award, Community Builder Award, Green Award, Innovation Award, New Business Award, Tourism Award and Young Professional Award.

"After the success of our Inaugural event in 2019, our Economic Development Committee is thrilled to be returning with the second annual Awards of Excellence," said Economic Development Officer, Rob Hunter. "Our local businesses play a vital role

in our community and create a vibrant local economy. These awards recognize the dedication and passion of our local entrepreneurs and professionals."

The online nomination forms and more information can be found on the Municipality's website www.southdundas.com/awards-of-excellence/.

Everyone is encouraged to nominate a business, organization or individual who they feel is deserving of this recognition.

If you have questions about the Awards Program or the nomination process, contact Rob Hunter at rhunter@southdundas.com or 613-543-2673.

MP Duncan

Continued from the front

In a press release dated September 2, Duncan is quoted as saying "It is an honour and something that came as quite a surprise. As a new Member of Parliament, I'm humbled that Erin has

selected me for this important job in our caucus". O'Toole commented how he is "incredibly proud to work with these dedicated and professional Members of Parliament who I know will help grow our Conservative movement and ensure more Canadians see a Conservative when they look in the mirror".

Duncan was elected as the Member of Parliament for Stormont, Dundas and South Glengarry in the 2019 Canadian federal election. He is shown here with Conservative Party of Canada Leader Erin O'Toole.

Notice of Commencement Environmental Assessment of the Township of North Dundas Waste Management Plan

The Township of North Dundas (Township) is beginning an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*.

What is Being Proposed?

The proposed EA Study is the EA of the Township's waste management plan for management of waste for a 25-year planning period. The Township is seeking to accommodate management of waste corresponding to the consumption of approximately 400,000 m³ of waste landfill disposal (amount to be confirmed during the EA Study) from 2022 to 2047, as its existing Boyne Road Landfill is currently at capacity. The EA Study will evaluate long-term solid waste management options to achieve this objective. Waste diversion can influence the amount of waste requiring disposal over the planning period; waste diversion is proposed as an alternative to be considered, including completion of a diversion study concurrently with the EA. The EA Study will include the area identified as the Township as shown using the black dotted line on the map below.

The Process

On July 1, 2020, the Minister of the Environment, Conservation and Parks (MECP) approved the amended terms of reference (ToR) for the proposed EA of the Township's Waste Management Plan. A copy of the approved amended terms of reference is available at: <http://northdundas.com/town-hall/landfill-recycling/environmental-assessments/landfilea/>

The approved amended ToR is also available at the following locations during normal business hours:

Township Office 636 St. Lawrence Street Winchester, ON (613) 774-2105	Winchester Public Library 547 St. Lawrence St N., 2nd Floor Winchester, ON (613) 774-2612	Counties of Stormont, Dundas & Glengarry Office 26 Pitt Street Cornwall, ON (613) 932-1515
--	---	--

This study will be carried out in accordance with the approved amended ToR and the requirements of the EA Act. Results from this study will be documented in an EA, which will be submitted to the MECP for review. At that time, the public, Indigenous communities, and other interested persons will be informed when and where the EA can be reviewed.

Consultation

Members of the public, agencies, Indigenous communities, and other interested persons are encouraged to actively participate in the planning process by attending consultation opportunities or contacting staff directly with information, comments, or questions. Consultation opportunities are planned throughout the planning process and will be advertised in the local Chesterville Record and through the Township's website at <http://northdundas.com/town-hall/landfill-recycling/environmental-assessments/landfilea/>.

If you would like to be added to our project mailing list or have project-related questions, please contact:

Doug Froats Director of Waste Management Township of North Dundas 636 St. Lawrence Street, P.O. Box 489 Winchester, ON K0C 2K0 Telephone: 613-774-2105 ext. 228 Fax: 613-774-5699 E-mail: dfroats@northdundas.com	Trish Edmond, P.Eng. Notice of Commencement
Environmental Assessment of the Township of North Dundas Waste Management Plan

The Township of North Dundas (Township) is beginning an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*.

[What is Being Proposed?](#)

2784 County Road 7, Chesterville, ON K0C1H0

The proposed EA Study is the EA of the Township's waste management plan for management of waste for a 25-year planning period. The Township is seeking to accommodate management of waste corresponding to the consumption of approximately 400,000 m³ of waste landfill disposal (amount to be confirmed during the EA Study) from 2022 to 2047, as its existing Boyne Road Landfill is currently at capacity. The EA Study will evaluate long-term solid waste management options to achieve this objective. Waste diversion can influence the amount of waste requiring disposal over the planning period; waste diversion is proposed as an alternative to be considered, including completion of a diversion study concurrently with the EA. The EA Study will include the area identified as the Township as shown using the black dotted line on the map below.

The Process

On July 1, 2020, the Minister of the Environment, Conservation and Parks (MECP) approved the amended terms of reference (ToR) for the proposed EA of the Township's Waste Management Plan. A copy of the approved amended terms of reference is available at:

September 10, 2020

The approved amended ToR is also available at the following locations during normal business hours:

Township Office 636 St. Lawrence Street Winchester, ON (613) 774-2105	Winchester Public Library 547 St. Lawrence St N., 2nd Floor Winchester, ON (613) 774-2612	Counties of Stormont, Dundas and Glengarry Office 26 Pitt Street Cornwall, ON (613) 932-1515
--	--	--

This study will be carried out in accordance with the approved amended ToR and the requirements of the EA Act. Results from this study will be documented in an EA, which will be submitted to the MECP for review. At that time, the public, Indigenous communities, and other interested persons will be informed when and where the EA can be reviewed.

Consultation

Members of the public, agencies, Indigenous communities, and other interested persons are encouraged to actively participate in the planning process by attending consultation opportunities or contacting staff directly with information, comments, or questions. Consultation opportunities are planned throughout the planning process and will be advertised in the local Chesterville Record and through the Township's website at

EXTERNAL EMAIL

Hi Yannick,

Thanks for sending the notice of commencement for above-mentioned project to the Ministry of Heritage, Sport, Tourism and Culture Industries (MHSTCI).

Please continue to send any notices, documents and/or information related to this project to the following MHSTCI contacts:

- Karla Barboza, Team Lead - Heritage (Acting) | Heritage Planning Unit (Heritage, Sport, Tourism and Culture Industries) | 416-314-7120 | karla.barboza@ontario.ca
- Kimberly Livingstone, Heritage Planner (Acting) | Heritage Planning Unit (Heritage, Sport, Tourism and Culture Industries) | 226-220-3338 | kimberly.livingstone@ontario.ca

In the meantime, let us know if you have any questions.

Thanks again,

Karla

Subject: Notice of Commencement - Environmental Assessment of the Township of North Dundas Waste Management Plan

CAUTION -- EXTERNAL E-MAIL - Do not click links or open attachments unless you recognize the sender.

Hello,

As a listed Government Review Team stakeholder in the Individual Environmental Assessment (EA) for the Township of North Dundas Waste Management Plan, we are herein informing you that the amended Terms of Reference submitted to the Ministry of the Environment, Conservation and Parks (MECP) was approved by the Minister on July 1, 2020 and the framework from the amended Approved Terms of Reference will guide the work and studies that will then be completed during the Environmental Assessment.

The second step in the process is to develop an Environmental Assessment study which should be carried out in accordance with the amended Approved Terms of Reference and the requirements of the *Environmental Assessment Act*. You will find attached the Notice of Commencement (NOC) of the EA study.

Please do not hesitate to contact me if you have any questions.

Regards,

Yannick

APPENDIX E

Technical Bulletin #1 - Diversion Study Results

Appendix E1 Technical Bulletin #1 and Feedback Forms

Appendix E2 Technical Bulletin #1 Advertisements and Notices

Appendix E3 Comments from the GRT

Appendix E1 Technical Bulletin #1 and Feedback Forms

What is waste diversion?

Waste diversion is the process of diverting waste from landfills by reducing, reusing and recycling material.

Why should we divert?

- Saves landfill space
- Saves energy
- Benefits the environment
- Benefits our communities

Did You Know?

Many residents in the Township participate in backyard composting of kitchen and yard waste materials.

Backyard composting is a method of waste diversion and helps to reduce the amount of organic waste going to landfill.

EA Process Tips

The Environmental Assessment Process requires the study to consider an option to “Do Nothing” along with the list of new options being considered in the study.

Waste Diversion Study

An Environmental Assessment (EA) of the Township of North Dundas (Township) Waste Management Plan is being undertaken under the provincial *Environmental Assessment Act*.

As part of the EA Study, a waste diversion study is being carried out to review the Township’s current programs and re-assess the long-term waste management diversion alternatives that are reasonable for the Township to consider within the EA process. Based on the information collected in this study, potential waste diversion options have been identified and evaluated, and the proposed enhancements to the waste diversion system identified.

What is Currently Diverted?

The Township currently provides curbside recycling collection of containers (plastic and metal) and fibres (paper and cardboard) for residential and some institutional, commercial and industrial waste. Once collected, recyclables are sorted at the Boyne Road Landfill facility before being sent to be recycled.

The Township also:

- Accepts drop-off of recyclables at the Boyne Road Landfill facility
- Accepts drop-off of tires, appliances, Waste Electrical and Electronic Equipment (WEEE) and Household Hazardous Waste (HHW) material
- Operates a pilot project for leaf and yard waste collection from a limited number of dwellings within the Township

Also, residents voluntarily participate in backyard composting activities.

What Options are Being Considered?

Waste diversion options have been identified as part of the EA Study for the Township and include the following:

- Do nothing and maintain the current system
- Collect food organics in a green bin program
- Enhance the current recycling collection program
- Introduce a full leaf and yard waste collection program
- Policy changes such as bans or bag limits

An evaluation of these options and results follow.

How Much is Diverted?

Approximately **23%** of the Township’s residential waste is currently diverted from landfill

Planned initiatives:

- Promotion and education for new and existing diversion programs
- Support local initiatives for waste minimization and re-use activities for materials such as pallets, textiles, cooking oil and construction and demolition materials (where possible to increase waste diversion)

How Were the Waste Diversion Options Evaluated?

The waste diversion options were evaluated using the five criteria listed below:

Environmental Impacts

Potential positive or negative impacts

Cost Effectiveness

Considered in two ways: 1) the cost required per tonne of waste material diverted; or, 2) the cost required versus the additional waste diversion percentage achieved

Social Acceptance / Economic Development

Expected community acceptability, including accessibility and convenience, practicality of transitioning to the new option and anticipated public participation

Feasibility for Township to Implement

Compatibility with the Township's current programs, services, and infrastructure, including the opportunities and challenges associated with implementation

Operational Considerations

Training requirements, maintenance, changes in practices and operations, liability, public health concerns, environmental risks, nuisances, market stability, etc.

What Were the Results?

A combination of waste diversion options is proposed for the preferred waste diversion system. The preferred combined waste diversion system includes:

- Backyard Composting of Food Organics
- Dual Stream Recycling Program
- Curbside Collection of Leaf and Yard Waste and Composting at the Boyne Road Landfill Site
- Use of Existing and New Waste Management Policies

What Effect Could This Have?

If this proposed combined system commences in 2021, the Township's residential waste diversion rate could increase to approximately 28% by 2025 and 33% by 2030

Send Us Your Feedback on the Proposed Waste Diversion Program!

We encourage you to let us know your thoughts by sending your comments to dfoats@northdundas.com and/or using the attached comment form.

A digital copy of the full Waste Diversion Study is available on our website at:

<http://northdundas.com/landfillea/>

Or contact us at 613-774-2105 ext. 235 for any accessibility requirements.

Hello,

I am forwarding you this email which was originally sent to Terri Forrester, as per the instruction on her bounced back email. We therefore included you on our list of Government Review Team for this project.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Yannick

Subject: Township of North Dundas Waste Diversion Study Technical Bulletin and Feedback Form

Hello,

The Township of North Dundas (Township) is undergoing an environmental assessment (EA) for the Township's Waste Management Plan under the *Environmental Assessment Act*. The EA Study will evaluate long-term solid waste management options for a 25-year planning period and enhanced at-source waste diversion is being considered as an 'Alternative To'.

As part of the approved amended Terms of Reference (ToR) requirements, the Township committed to conduct a Waste Diversion Study. As per the consultation plan presented in the approved ToR, a Technical Bulletin summarizing the results of the Waste Diversion Study has been published on the [project website](#) for review by the public and a feedback form is also available to provide comments to the EA Study team. Both files are attached to this email and contain instructions to contact the EA Study team and return a filled out copy of the feedback form.

Please do not hesitate to contact me if you have any questions.

Regards,

Yannick
