

Notice of Study Commencement

Township of North Dundas Winchester Sewage Treatment System Upgrades Schedule C Class Environmental Assessment

The Township of North Dundas has initiated a Class Environmental Assessment (Class EA) to determine the most suitable expansion and/or upgrades to the Winchester Sewage Treatment System (STS) over the next 20 years.

How Will This Affect Me?

The study will assess current and future requirements of the Winchester STS, including the lagoon, sewage pumping stations, forcemains and effluent discharge piping and make recommendations for upgrading and/or expanding as required to meet the Township's goals and needs.

Public and agency consultation is a key element of the process. Based on your input, alternative strategies will be evaluated to identify optimal community, environmental and economic opportunities.

How Do I Get More Information?

A Public Information Centre (PIC) will be conducted in the summer of 2017 prior to finalizing the preferred solution. In the meantime, the study team is reviewing background data and determining alternative solutions. You are also invited to contact a member of the study team at anytime with questions or to provide input into the study.

Updates will be provided throughout the study on the Township website, and if you have any questions regarding the study, please visit the website at www.northdundas.com or contact one of the people listed below.
